SUMMARY	Software engineer with 12 years of experience building distributed systems, data platforms, and AI-powered products. I work across teams to set engineering standards, lead architecture, and grow other engineers. Most recently I pioneered LLM-assisted development and AI product infrastructure at GovSpend, and I now work at Fieldguide.	
EXPERIENCE	Senior Software Engineer - Fieldguide https://fieldguide.com	Aug 2026 - Present
	Senior Software Engineer II - GovSpend https://govspend.com	Oct 2023 - Aug 2026
	- o Pioneered LLM-assisted development across the company, building shared tools that cut biweekly release prep from 1-2 hours to minutes and help engineers write high-quality RFCs. - o Established formal technical design (RFC) and deployment standards, raising engineering quality across every team. - o Led AI work spanning research, prompt strategy, and infrastructure, including summaries for over 2 million meetings and semantic search over government documents. - o Cut infrastructure costs by profiling slow queries, dropping unused indexes, and cleaning up terabytes of MongoDB and Elasticsearch data.	
	Senior Software Engineer - Kevel (formerly Adzerk) https://kevel.com	Nov 2014 - Sep 2023
	- o Key engineer during growth from 10 to 150+ employees; implemented high-performance ad engines and APIs, oversaw campaign management UI evolution. - o Won high-profile enterprise customers by overhauling authentication to support SSO (SAML, OIDC) and implementing Content Security Policy, raising Mozilla Observatory score from F to A. - o Led technical design processes, mentored dozens of engineers, and streamlined feature delivery with CI/CD pipelines.	
	Disability Examiner / ODAR Specialist - NC Disability Determination Services	Aug 2008 - Nov 2014
	o Determined eligibility for Social Security disability by analyzing complex medical and vocational records, managing a demanding caseload while serving as the sole liaison for federal hearings offices.	
EDUCATION	University of North Carolina - Chapel Hill Bachelor's degree - Music Composition and Bassoon Performance	2004 - 2008
PROJECTS	Alda	2012 - present
	A text-based programming language for music notation, MIDI production, and generative music. - o https://github.com/alda-lang/alda - o Popular open-source project (5,000+ GitHub stars), featured on HackerNews - o Presented at international conferences, including ICFP, Compose Conference, and Strange Loop	
SKILLS	Technical design: Distributed architecture, Domain-Driven Design, SDLC, testing approaches People: Onboarding, mentoring, documentation, planning and prioritization, cross-team collaboration AI: Prompt engineering, semantic search, Langchain, Langfuse, LLM-assisted development Backend: Temporal, Go, TypeScript, Node.js, Clojure, Java, C#, REST APIs Frontend: TypeScript, React, JavaScript, XState, UX design, SSO, SAML, OIDC, ClojureScript Databases: Relational (SQL Server, PostgreSQL), NoSQL (MongoDB, Elasticsearch, Redis, DynamoDB) DevOps: Linux, Bash, Git, AWS, GCP, Datadog, monitoring, logging, observability, CI/CD, standards compliance
